## KaFe Rocks

partners with My Rainforest, one of the largest and most successful privately-owned rainforest conservation areas in the Peruvian Amazon.

KaFe Rocks is a first category Rainforest Sponsor and finances the conservation of **600 hectares of primary mountain rainforest**. By doing so, KaFe Rocks secures the sequestration of approximately **4500 tonnes of CO2** in the ecosystem, equivalent to about three times KaFe Rocks' own carbon footprint and that of all its staff.

KaFe Rocks' donations are used for the protection and research of one of the last intact cloud forests in the Peruvian Andes, the 20,000 hectares My Rainforest conservation area. **With the help of KaFe Rocks we employ forest guards, partner with universities, and help the local population through the pandemic. Thank you, KaFe Rocks!**

The area is home to ten villages whose sustainable coffee helps them save and defend the rainforest. My Rainforest is also the habitat of an overwhelming diversity of plant and animal species, many of them are endangered and some have not even been described by science.

**Together we can make a difference for our world and our children!**
